

# Upgrading mooSocial

Upgrading mooSocial is even a simpler process than installing. There are a few things you need to know and do before the upgrading process.

## Know

- Access to your web server (via shell, cPanel, DirectAdmin, Plesk or FTP)
- An FTP client such as [FileZilla \[https://filezilla-project.org\]](https://filezilla-project.org)
- Your Web browser of choice

## Do

- Download the latest release available of mooSocial
- Unzip the downloaded file on your hardrive
- Make sure to backup your files and database before upgrading
- Do take your site offline using “Take Site Offline” and “Offline Message” in System Settings
- Clear Global Caches after upgraded successfully
- It is recommended that you create a mirror site then do the upgade there first. Once everything is ok, proceed to upgrade the live site.

## Video

(Coming Soon)

## File Upload

Upload all files and folders within mooSocial directory to the same location where the previous version was installed so that the new files overwrites existing ones.

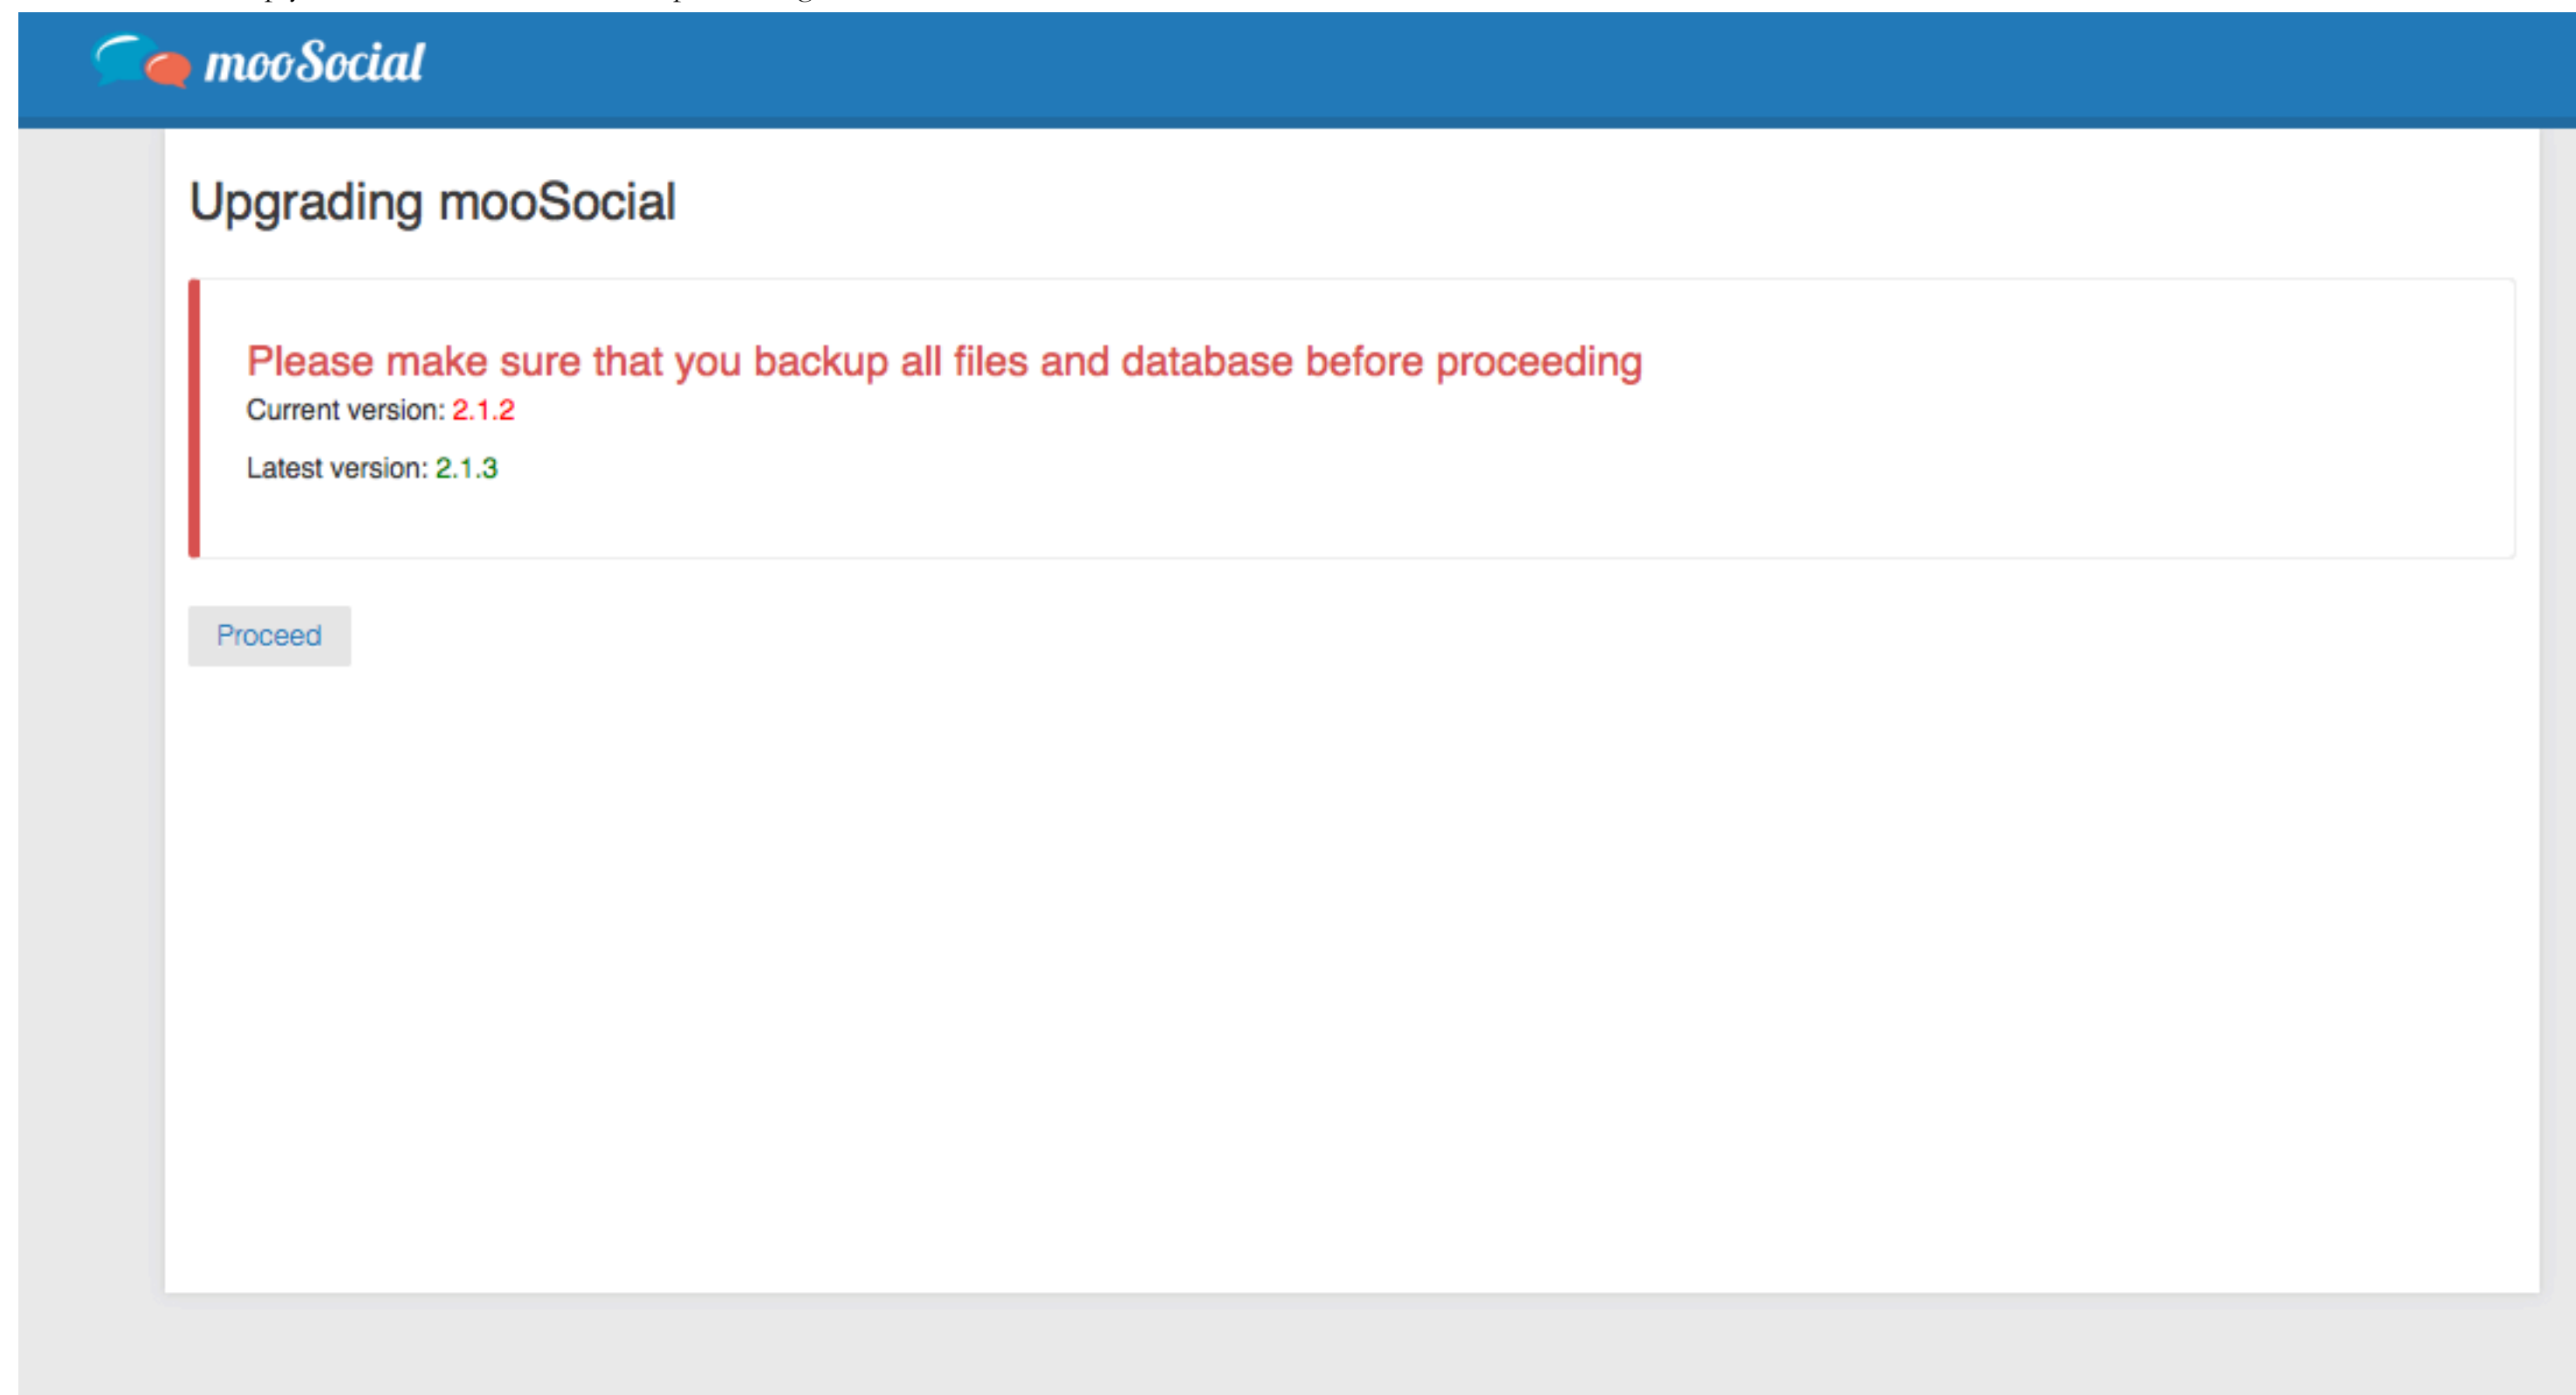

**Note:** If your FTP client has an option to convert file names to lower case, make sure it's disabled.

## Upgrading Wizard

Run the Upgrading Wizard by accessing the Upgrade URL in the web browser. This should be <http://www.yourdomain.com/upgrade> [<http://www.yourdomain.com/upgrade>] or <http://www.yourdomain.com/index.php/upgrade> [<http://www.yourdomain.com/index.php/upgrade>] (without mod\_rewrite)

### Step 1: Start the Upgrade Process

Make sure to backup your files and database before proceeding. Click **Proceed**
